'SpaceWorks'

Office is the place where idea, creativity, innovation and success become real.

From here, we started the concept of 'SpaceWorks', the science of integrated solutions to create a modern office. It is a place where people work, meet and connect.

The way we work has changed. From the rise of mobile knowledge workers to generational changes and technological advances, many forces are continuously impacting how and where we work.

Nowadays, people can work more flexibly than ever before. To stay relevant in this fast-paced world, our work environments need to change.

The concept of 'SpaceWorks' will be the solution to create a Modern working environment by merging the modern spaces with the digital solutions, companies can give their employee the flexibility to work in the way that they need. Our variety of furnitures along with technology solutions designed to promote communication, movement and employee health.

Our solutions also support your people working on a diverse range of activities, from deep thinking to knowledge sharing and collaboration. As a result, the organization, can enhance the experience of the employees, leading to better them collaboration, more innovation, and more knowledge-sharing while decreasing office space cost which in turn boosts business performance.

WELCOME TO A

MODERN OFFICE

▼ we're entering the era of the modern smart office.

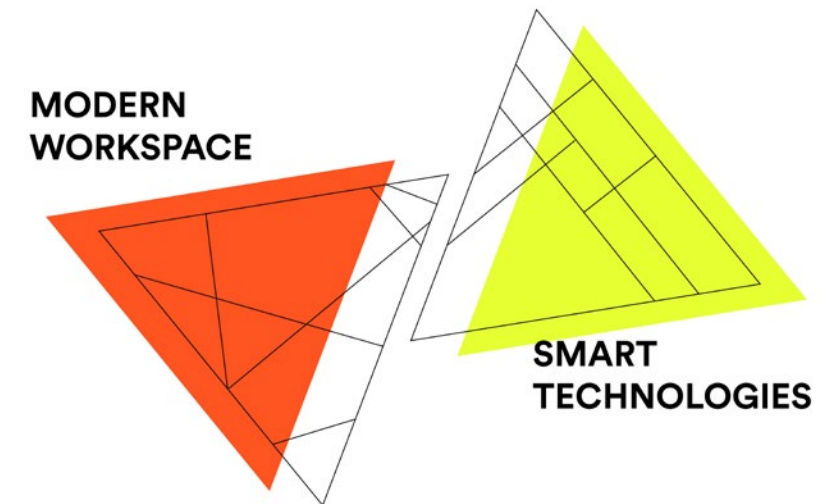

BUT WHAT DOES IT REALLY MEAN?

WHAT MAKES AN OFFICE 'SMART'?

Today's employees want to work in a way that suits them. Sitting or standing, a bustling central workspace or a smaller quiet space, indoor and outdoor areas, people want to move seamlessly between the buildings and spaces. Forward-thinking companies are creating flexible and modern spaces to increase collaboration and productivity. But they can do more. The office of the future is not just a beautiful building. It is a modern smart office.

It's about an integrated environment that combines thoughtful modern workspace and smart technology; forming a culture that enhanced productivity and employee experience to

▼ **WORK smarter, better, and faster.**

Modern workspaces are designed to provide a variety of work setting and areas of an office that allow employees to choose based on a diverse range of tasks throughout the day, from deep thinking to knowledge sharing, collaboration and everything in between.

A smart Office refers to the use of connected technologies to support modern workspace in order to engage employees with their work environment.

- Sleek design for your workspace

MEETING ROOM WAYFINDER.

Keep everyone on track with Wayfinder

Our Wayfinder solution displays easy-to-read Booking information and provides direction to visitors and meeting attendees.

Managing a safe return to the office

OUR WORKSPACE SCHEDULING SOLUTION.

Condeco's workspace management software provides a simple-to-use solution that answers the new challenges presented by Covid-19.

EASILY REMOVE SPACE TO ENABLE DISTANCING

The solution enables you to easily adjust your existing workspace to a less dense layout that enables effective social distancing by reducing the number of usable desks and the capacity of meeting rooms in a few simple steps.

MANAGE THE NUMBER OF EMPLOYEES IN THE OFFICE

Condeco manages the reduction in available space by limiting the number of days an employee is able to book a desk in the office and promoting continued periods working from home. In addition to the reduced days, the system can create effective firewalls across teams by creating groups of employees that work alternate weeks or on different floors, ensuring business continuity.

ENABLE EFFECTIVE WORKSPACE SANITIZATION

A comprehensive vendor workflow manages deep cleaning. The automatic workflow is triggered by changes to bookings and monitors that a cleaning task has been completed before a desk or meeting room can be used.

TRACE CONTACTS IN CASE OF SICKNESS

Condeco records the details of every desk booking and meeting in a contact tracing database that enables rapid tracing of employee contacts should someone become ill. The system produces detailed reports for the HR teams and notifies the colleagues in question of the potential contact with someone who has been tested positive for the virus.

While the phased return to the office is still being discussed by most organizations, Condeco offers a solution that enables you to bring back employees in a safe and controlled process.

VISITOR MANAGEMENT

Smart Technologies

Proxyclick is a cloud-based visitor management platform built for the best-of-breed needs of the global enterprise. The platform helps trusted brands across every industry to transform the way they welcome their visitors, employees, and contractors. Proxyclick's clients include L'Oréal, Vodafone, Revolut, PepsiCo, Audi, and other global Fortune 500 companies.

We integrate with dozens of systems and apps to make managing people flows easy, including access control systems, desk booking platforms, calendar apps, storage apps, and more.

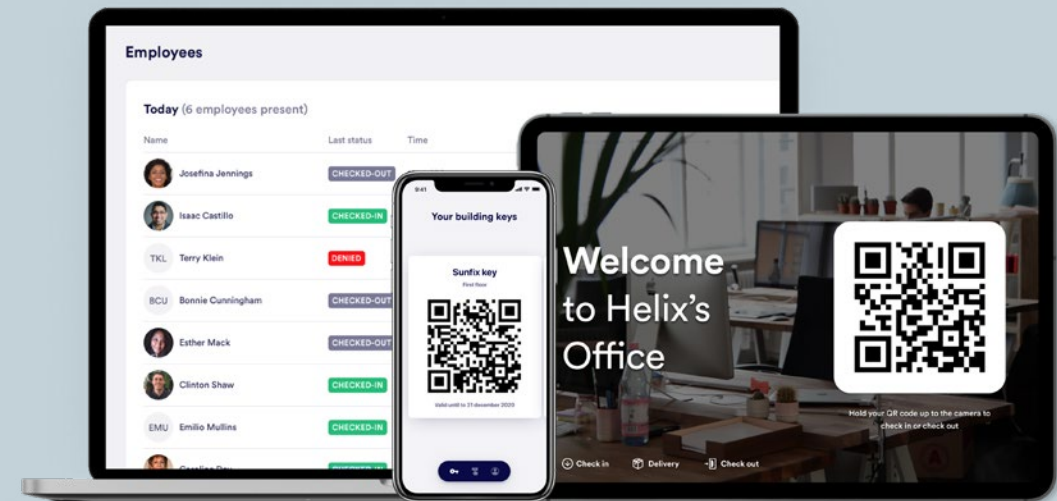

With more than 35 million visits registered in 10,000 locations around the world, Proxyclick's solution allows organizations to minimize security and compliance risks while upholding privacy rights.

PROXYCLICK FLOW: OUR ENTERPRISE SOLUTION FOR MANAGING YOUR PEOPLE FLOWS

The changing workplace requires innovative, collaborative solutions that prioritize safety and security without compromising on smoothness, efficiency, a warm welcome, and a great system for people flow management.

Proxyclick's cloud-based visitor management platform is built for the best-of-breed needs of the global enterprise. Through our Proxyclick Flow platform, our solution extends beyond visitor management to provide trusted brands across every industry with a single solution to manage visitor, employee, and contractor flows in compliance with global regulations. Proxyclick Flow unites access requirements, regulations, and systems, and can be tailored for organizations with single locations as well as for complex, cross-continent, multi-location set-ups and multi-tenant business sites.

As organizations of all sizes have the duty of care to keep their people safe, while also remaining compliant with changing local and national data privacy laws, Proxyclick's solution provides them with the following features:

Remote registration : Send digital health questionnaires to employees, contractors, and visitors ahead of their arrival on-site. Deny them access to the building if they do not meet screening criteria.

Desk booking : Allow employees to schedule their attendance and book their desks in advance, helping organizations adhere to building occupancy levels and ensure physical distancing on-site.

Touchless check-in : Grant employees, visitors, and contractors access to your building via unique QR codes that can be scanned from their mobile devices at kiosks, as well as doorways, turnstiles, and elevators via destination dispatch for an entirely touchless check-in process. Employees can use the Proxyclick Proovr app to immediately scan their app against unique QR codes at check-in and check-out.

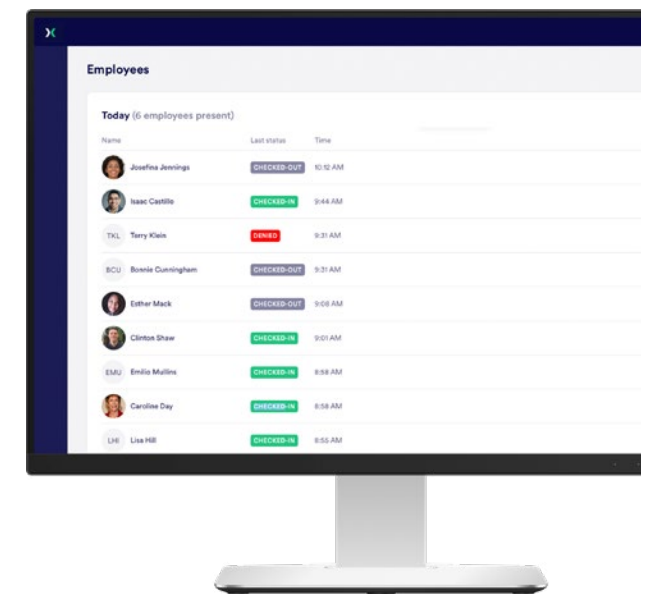

Touchless temperature scanning : Integrate contactless temperature scanners to take employees' temperatures upon arrival, and deny them access if they have a fever.

Analytics & reporting : Get access to real-time occupancy data to understand who was on-site at what time, and who they may have come into contact with, to facilitate contact tracing.

Data privacy : Proxyclick is committed to respecting data privacy, giving users the option to easily delete data, and businesses peace of mind by securely storing health data.

Emergency messages : Send an automatic message to every person on-site in case of an emergency.

SMART LOCKER

Smart Technologies

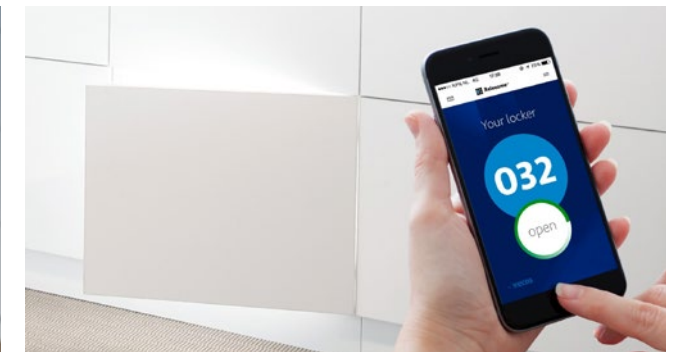

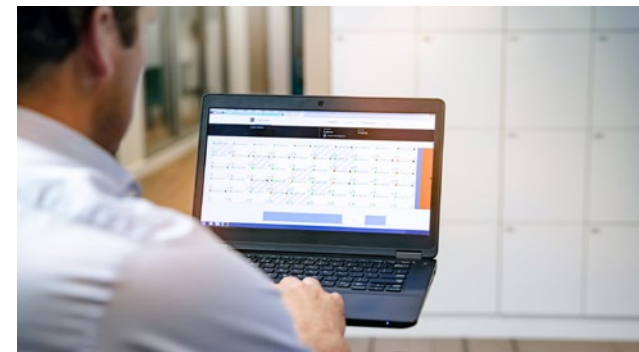

READY NOW AND IN THE FUTURE

The Vecos locker management system seamlessly fits into a connected agile or activity-based workplace with integrated services. The self-service smart locker system collects data based on locker usage and adapts to its users' requirements.
